REFERENCE [redacted]

NO. OF ENCLS. (LISTED BELOW)

25X1A

SUPPLEMENT TO REPORT NO. [redacted]

[redacted]

25X1X

1. Polish artillery units are now equipped with guns of the following calibers:

Type of Unit	Caliber Gun
a. Heavy artillery	152 mm.
b. Howitzer artillery	122 mm.
c. Field artillery	76 mm.
d. Anti-tank artillery	45 and 76 mm.
e. Anti-aircraft artillery	37 and 85 mm.
f. Tank units	76 and 85 mm.

2. A heavy artillery regiment is organized as follows:

a. Regimental commander
b. Regimental staff
c. Regimental command platoon
d. Regimental supply corps
e. Two battalions

The full complement of a battalion is four batteries, each with four 152-mm. guns. At the present time, heavy artillery regiments have only one fully equipped and staffed battalion, while the second battalion has only skeleton staff and equipment. For this reason a regiment consists of 300-350 men.

3. The heavy artillery brigades previously reported[1] included an additional battalion known as the measurement artillery battalion (Dywizjon artylarii pomiarowej). These battalions have been liquidated. An additional artillery regiment has been organized at Lwow (Thorn).

4. American tractor equipment (which consists mostly of Studebaker tractors) used by Polish motorized heavy and howitzer artillery regiments, is being replaced by Soviet JA-2 caterpillar tractors.
